When the committee reassembled Clarke testified that he was under the impression that he, and also Brewster, signed the second set of certificates, and the gentlemen signed in the committee room and not in the gov-ernor's office, as Brewster testified yesterday; he had read a statement in a Cincinnati paper to the effect that some of the signatures of the Louisiana electoral returns had been forged, and thought that he clipped the paragraph from the paper and subsequently inclosed it in a letter to Governor Kellogg, inquiring what it meant, but he had never received a reply to the letter; never had heard anything while in New Orleans of the socalled Sherman letter; in consequence of the objections made by Governor Kellogg to the

Sensational Developments in the Vos burgh Case-He is Now Accused Not Only of Attempting to Murder his Wife, but of Stealing the Poison.

NEW YORK, June 13 .- A striking devel-

opment in the Vosburgh wife-poisoning case was made to-day. He asked a great many questions, which I answered. He talked more especialfor different persons. He asked how much it would take to kill, and I told him. I took down the antimony bottle and showed it to him, and he took it in his hand and looked at WALTER TALBERT, O. S. Special Order, No. 5.] Memphis, June 16, 1878.

THE members of this command are hereby ordered to assemble at their armory, in full dress uniform, this (SUNDAY) afternoon, at 4 o'clock, for the purpose of participating in the laying of the corner stone of the new Medical College. By order S. T. CARNES, Captain Com'dg.

A. W. JONES, O. S. and asked if that was the place for it. When the rumors about the poisoning were affoat I recalled the conversation, but did not mention it to anybody lest I should be doing Mr. Vosburgh an injustice. I could not believe Mr. Vosburgh guilty. I thought I knew him too well. I did not say a word to any living soul, not even to my mother. When counsel were summing up the case I happened to look at the jar containing tartar

grain out since I got it in, some six or eight months ago, and since that time I have not used half an ounce-I will swear not over an unce. Vosburgh dropped in after that, but never again mentioned the subject of poisons. He had had an opportunity to help hemself to my antimony on two occasions. I would have said what I knew to the prosecuting of ficers, but they were summing up and I hought it too late. On the Tuesday after the verdict I went down to Mr. M'Gill's office and told him what I have said to you." "Do you recall any other visits of Vosburgh's?" Only one. He came in when the grand jury

Ventilation. Sanitary Record: Many persons complain always getting up tired in the morning. This is very often due to defective ventilation of the bedroom, or from using an undue amount of bedelothes and bedding. Feather beds are too soft and yielding, and partially envelop the sleeper, thus producing profuse perspiration. The habit of lying too much under blankets is also very pernicious by reason of the carbonic acid exhaled by the sleeper being respired. Again, it is a common error to suppose that by simply opening a window a little at the top a room can be ventilated. People forget that for proper ventilation there must be an inlet and outlet for the zir. In bedrooms there is often neither, and if there is a fireplace it is generally closed up. Again, it is a mistake to suppose that foul air goes to the top of a room. Certainly the heated air goes to the top, but the chief impurity, the carbonic acid falls to the bottom. There is nothing so efficacious in removing the ower strata of air as the ordinary open fire-

of the antimony, and says it is wholly false.

Daring Robbery at Cairo. CAIRO, June 15 .- At two o'clock yesterday morning, James A.
